

MP10

High-Performance
Folded Motion
**Multi-Purpose
Speaker**

Its incredible versatility delivers amazing performance wherever you need it.

For the next generation of our Motion Series, we wanted to do something extraordinary. Tired of the "status quo," we went back to the drawing board, tasked with reinventing the legend of Motion Series. We came up with all-new audio technologies, a bold design, and modern finish options. We changed everything, leaving nothing on the table, to bring you our best Motion Series ever.

As the most versatile speaker in the Motion® lineup, the MP10 can be used as almost any channel in a Home Theater, or as part of a dedicated 2-channel system. The innovative shape and mounting system allows MP10 to be used as a shallow depth bookshelf speaker or wall mounted using the included mounting bracket. It can be mounted parallel to the wall surface or flipped upside down to angle downwards into the room, perfect for when installation above ear level is desired. MP10's Gen2 FMT and Folded Motion Waveguide ensure that your listening area is blanketed in clear, detailed sound wherever you decide to install it.

MP10

Application

Multi-Purpose

Frequency Response

81 Hz - 25kHz \pm 3 dB

Dispersion

90° (vertical) x 90° (horizontal)

Sensitivity

92 dB

Impedance

5 ohms

Crossover Frequency

2100 Hz (2-way)

High Frequency Driver

1" x 1.4" (2.6cm x 3.6cm) Gen2 Obsidian Folded Motion® Tweeter with 9.2 in² (59.4 cm²) diaphragm.

Mid Frequency Driver

5.5" (14cm) Woven Fiberglass cone with cast polymer basket. Unibody cone construction.

Low Frequency Drivers

N/A

Cabinet

Stealth Rear Ported

Recommended Amp Power

20 - 200 watts

Binding Post Inputs

Custom 5-way binding posts

Weight

9.7lbs / 4.4kg

Dimensions (HxWxD)

14" x 8" x 5"
35.6cm x 20.3cm x 12.7cm

Finish

Gloss Black, Walnut, and Satin White

Product dimensions include feet, binding posts, and grilles.

Specifications are subject to change without notice.

Controlled Dispersion

Any time your speaker reflects sound off of a surface in your room, it changes the sound in some way. One of the most harmful changes that occurs is the result of the first reflection point, or the first point at which sound begins to bounce off the walls or other surfaces in the room. Controlled Dispersion minimizes these sound degrading early reflections by controlling the spread of sound from the tweeter into the room, enhancing your listening experience with greater clarity, and expanding placement options in any room.

Gen2 Obsidian Folded Motion Tweeter

Our signature thin-film tweeter technology just got better. With an upgraded motor structure, the latest Gen2 FMT provides higher output and lower distortion than ever before.

Folded Motion Waveguide

After an extensive evaluation of nearly 50 design options, the Folded Motion Waveguide profile was meticulously chosen to harmoniously align with the dispersion of the midrange drivers, resulting in enhanced output. The waveguide guarantees consistent sound quality regardless of the listener's position and minimizes unwanted room reflections. Proper waveguide design is crucial as it helps control the sound's dispersion pattern, ensuring that the sound is evenly distributed across the listening area, resulting in optimal sound quality.

Woven Fiberglass Mid-bass

The lightweight and robust Woven Fiberglass mid-bass in the MP10 is perfectly suited for keeping pace with Motion's Gen2 FMT, providing crystal clear dialogue, vocals, and lifelike instrumentals. Perfectly pairs with Motion CI products to easily create customized solutions.

Stealth Bass Port

MP10's Stealth Bass Port allows it to achieve comparable bass output to that of traditional bookshelf speakers but at half the depth. Its innovative shape and mounting system allows MP10 to be used as a shallow-depth bookshelf speaker or wall mounted using the included bracket. When wall mounted, the brilliant Stealth Bass Port does not interfere with the bracket allowing MP10 to be mounted parallel to the wall surface or angled downwards into the room, perfect for when installation above ear level is desire.

Secure-Lock Grilles

Besides looking modern and elegant, our new Secure Lock grille design uses clever, stealth mounting tabs to securely hold the grilles in place while also allowing you to customize the appearance of your speaker. Instantly create a unique look to suit your preference at any time by choosing which grilles to leave on or off, or even rotating the grilles to display the grain of the fabric how you prefer.

McCracken-Vojtko Crossover

Named after our acoustic engineers, this new custom crossover perfectly melds the bespoke driver platforms. Carefully designed using proprietary measurement and simulation software, and fine-tuned and evaluated using double-blind listening tests, the McCracken-Vojtko crossover is the maestro that weaves all the elements into a cohesive whole.
